Education

Sapienza University of Rome — MSc, Artificial Intelligence and Robotics · Oct 2026 – present

Sapienza University of Rome — BSc, Applied Computer Science and Artificial Intelligence · Sep 2023 – Oct 2026

- Graduated 110/110 with honors.
- Thesis: built a data preprocessing pipeline that converts vision-language datasets with noisy, human-annotated captions into supervision for hyperbolic embeddings of images and text descriptors.

Skills

- **Robotics and AI:** robotics, robot programming in C++ (in progress), machine learning, deep learning, vision-language data, embeddings, dataset preprocessing and cleaning
- **Programming:** Python, R, C++, Java, JavaScript, Go, Dart, SQL
- **Web and software:** React, Vue.js, HTML, CSS, web and software architecture, object-oriented programming
- **Design and 3D:** Blender, Figma, Procreate, Adobe Illustrator
- **Languages:** Turkish (native), English (C1), Italian (A2), French (A1)

Relevant Coursework

- **AI:** Artificial Intelligence, Machine Learning, Advanced Machine Learning, Deep Learning
- **Robotics and systems:** Robotics, Robot Programming in C++ (in progress), Computer Architecture, Signal Processing
- **Data and optimization:** Data Management and Analysis, Linear Optimization, Bioinformatics

Robotics and AI Projects

FIRST Robotics Competition · 2018 – 2023

- Head of the coding division; won the Rookie Award.

- Created a one-year curriculum to prepare new members for competition.

Thesis: Hyperbolic embeddings from noisy vision-language data · Sapienza, 2026

- Designed a preprocessing pipeline that turns noisy human-written captions into usable supervision for hyperbolic image–text embeddings, which is the same data-quality problem behind learning from human demonstrations.

EvZane: app for bedridden patients' medical supply needs · TEKNOFEST, 2021

- Competed in the social innovation category and reached the 3rd stage.
- Designed the front-end mockup of the mobile app and wrote the solution plan report.

Video game design and fundraising · TSA (Technology Student Association), 2019 – 2023

- Video Game Design team member for 2 years; President for 1 year.
- Wrote a sponsorship package and raised $5,000 to fund the team's travel.

Teamwork and Leadership

Project Team Manager — FutureTea (remote startup) · Jan – Jul 2025

- Managed the project team building an AI app for checking the reliability of sources.
- Designed the full UX of a separate mental health app.

Tutor and President — Coding Club, The Koc School · 2019 – 2023

- Built a one-year curriculum and taught Python and Pygame to middle and high school students.

Head of IT — MUNDP (Model UN Development Conference) · 2019 – 2022

- Updated the conference website and handled live issues during the event, such as a website crash.

Awards

- First Robotics Competition Rookie Award
- SAGE team award for a business model (2022)
- ECIS International Understanding Award (2022)
